MEMORANDUM FOR: Chief, Defensive Systems Division, OSI

ATTENTION: [Redacted]

FROM: Chief, CIA/PID (NPIC)

SUBJECT: Detailed Photographic Interpretation of the Sary Shagan
Explosive Storage and Handling Areas, USSR

REFERENCE: (a) Requirement OSI/R-224/62
(b) CIA/PID Project C 992-62

1. This memorandum is in response to your requirement dated 25 September 1962 requesting a detailed photographic interpretation of the Sary Shagan Explosive Storage and Handling Areas based on [Redacted] photography, [Redacted] and including detailed sketches and a stereogram of the facility.

2. The attached drawing of the facility includes dimensions and distances of all observable features within the facility. Door sizes were estimated when discernible but due to the verticality of the photography these were not observable in most instances. The turning radii of roads within the facility ranged from 25 to 150 feet. Building heights are + 5 feet due to the poor quality of the shadow images. The heights of the revetments have been estimated for the same reason.

3. The photo analyst on this project is [Redacted] and he may be contacted on extension [Redacted] should you have any further questions concerning this project.

4. This project is considered to be complete.
